Medical Store Automation

“XYZ” is a medical store, which purchases medicines of reputed Companies. Medicines can be Tablets, Syrups, Tubes, Capsule, ...etc.

Every Medicine is associated with Company Id, Product Number and Batch Number. Medicines are categorized according to multiple forms. (For eg, Corex 100 ml, Corex 50 ml, Cleocin 300 mg, Cleocin 150 mg, etc...)

The Store maintains the stock and reorder level of every Medicine according to measuring units.

Everyday system must generate the list of medicines whose stock go below reorder level so that order can be placed to the supplier.

Medical store has number of Suppliers from whom Medicines are bought. Store places order to the Suppliers when required and maintains details of Orders placed, and one supplier can supply medicines of only one company but one company have many suppliers.

Purchase register is maintained and updated whenever an order is supplied by any of the Supplier. Free Samples are not sold and distributed free of cost.

Expiry Medicines list must be generated daily so that they can be displaced from the Store.

Sales register is also maintained with appropriate details. MRP of each medicine is inclusive of all taxes. Assume that Medicines can be sold according to the packaging i.e. a complete strip of tablets. Bill generated at the time of sale and stock management is also expected from the proposed system. Each & every task of the Medical Store is required to be automated, So that working efficiency gets improved.

Medical Store Management requires reports of Products, Purchasing Details, Order Details, Bill Details, Expired Medicine Details, Daily/Monthly/Yearly Sales Amount Report.
