Restaurant Management System

- 1) All the tasks of the Restaurant are required to be automated so that inefficiency can be eliminated
- 2) This project on Restaurant Management System includes automation of various tasks of a Restaurant.
- 3) The Restaurant manages category-wise inventory of various dishes available.
- 4) The customer can either walk-in directly into the restaurant or can use the facility of Advance Booking.
- 5) If customer walks-in to the restaurant, then he/she is allotted the tables according to the number of persons in his/her group, and according to his requirements for AC/Non-AC facility.
- 6) In case of Advance Bookings, the restaurant provides various facilities like:
 - a. A customer can ask for 1 or more tables: If the customer asks for multiple tables, then proper care has to be taken that all the allotted tables belong to the same hall.
 - b. A customer can ask for a personal hall.
 - 7) If the customer goes for advance booking, then he/she must:
 - a. Specify the desired date and time.
 - b. Pay some advance according to the policies of the restaurant.
 - c. Specify the number of persons in his/her group.
 - d. Specify that whether he/she wants to avail AC facility.
 - e. Specify the desired menu.
 - 8) The name and contact number of the customer, booking the table(s)/hall in advance, are stored.
- 9) The charges of AC, Service tax etc. is fixed for all customers in case of Advance Bookings and Current Bookings.
- 10) The System will automatically free the tables/halls if the duration for which it was booked has elapsed.
- 11) After the Orders are fulfilled, the bill is generated and given to the customer.
- 12) If customer wants to cancel the advance booking, he/she may cancel it 3 hours before the start time of date for which the booking was done. In this case, 90% of advance amount is refunded.
- 13) The restaurant requires reports for:
