

Stock Monitoring System

- ON-THE-WHEEL CO. is and automobile manufacturing organization engaged in manufacturing of various models of cars.
- Production department of the company is responsible for manufacturing a car. Department requires various parts and subassemblies of the different companies. whenever department needs some parts then it sends the requirement slip to the production department in the following format :

Requirement slip			
Date- 20-march 2014			
	Part Name	Company	quantity
	Tyre	MRF	50
	Seat	MRF	10
	Tyre	TATA	10
Total <<count>>			<<sum>>
Signature			

- Stock department of the company maintains the store. Where it keeps the record of each part like company, quantity, re order level etc.
- Stock department places order for parts to the supplier of the company and on receiving the order it updates the stock.
- As per requirement of production department, stock department issues the parts to it.
If any part is no longer needed in production department, it can be returned to stock department.
- Records of issued/ returned parts maintained by stock department.
- Department also generates the list of parts whose stock is below reorder level, so that parts can be reordered to the supplier of the company.

Store generates the following reports:
